## RFM 652 Flexible abrasives for Aluminium, NF metals

### Applications

Aluminium  
NF metals

### Properties

Bonding agent Plastic  
Grain SiC

Advantages: Produces a satin surface scratch pattern - Soft abrasion due to elastic structure - Can be used until completely worn down - Available in two executions: with full length round shaft (standard execution, stock items) or with flattened shaft for simple and secure clamping in tool holders with clamping screw (made to order items)
